

AC-215

CEMENT DESCALER

Characteristics

Presentation	: Orange liquid
Nature	: Hydrochloric acid
PH 10 g/l	: $1,16 \pm 0,3$
Density at 20°C	: $1,13 \text{ g/cm}^3$.
Freezing point	: $- 18^\circ\text{C}$

Applications

C.Q.B. AC-215 is an acidic product used for cleaning lime, cement, concrete, oxides, etc.
Rubber or plastic gaskets remain unchanged.
It should not be used on delicate surfaces such as aluminum, for this use C.Q.B. ALUBRILL.

Instructions for use

Dilute AC-215 to 10% in water and apply by spraying on the surface, allowing it to act depending on the thickness of the layer and then rinse with water.
Finish with a wash with a bodywork product such as BAT or A-510.

Presentation

Polypropylene container of 28, 240, or 1,200 kg.
