## ***COLD DEGREASER***

### **Characteristics**

|                 |                            |
|-----------------|----------------------------|
| Presentation    | : Yellow liquid            |
| Smell           | : Citric                   |
| Density at 20°C | : 0,76 g/cm <sup>3</sup> . |
| Flashpoint      | : - 10°C                   |

### **Applications**

C.Q.B. DS-650 is a cold degreaser that is used to clean mechanical parts in a washing fountain. Contains natural citrus solvents that give it greater degreasing power and a pleasant lemon smell. It is respectful of joints and plastics and is not corrosive to metals. It offers a high dielectric coefficient and does not contain chlorinated derivatives.

### **How to use**

Regardless of the method chosen, degrease the piece for approximately 10 minutes, which will be depending on the amount and nature of the grease to be removed, and then let it drain or dry with a cloth.

A greasy appearance and excessive drying time will indicate that the product is saturated, and it is time to replace it.

### **Presentation**

Polypropylene container of 25, 220 and 1.000 lts.
